Profile

Computer Systems Technology student with hands-on experience in designing, building, testing, and documenting software systems. Strong in problem solving and analysis, technical communication, and collaborating with others in development.

Education

Computer Systems Technology Diploma

Saskatchewan Polytechnic Regina | Regina, Saskatchewan | Expected: June 2027

- Tutored and assisted students with challenges and problems to improve their academic skills
- Led teams of students in projects and assignments to keep everyone consistent and informed of their tasks
- Maintain a consistent and strong academic performance with a 90%+ year average

High School Diploma

Michael A. Riffel High School | Regina, Saskatchewan | September 2021 - June 2025

- Achieved distinction and honor roll in every academic year to stay ahead for post-secondary education
- Maintained a strong academic performance with an 80%+ average in math and science courses to excel in computer science
- Demonstrated resilience and improvement over the course of 1-2 years, going from low 80% in Grade 11 to an over 90% average in Grade 12

Technical Skills

- Develop in a variety of programming languages such as Java, JavaScript, and C#
- Operated with various relational databases like MySQL and MariaDB
- Build static and dynamic websites with HTML and CSS
- Coordinate with others and their code with Git
- Navigate and develop with both Linux and Windows

Projects

Air Quality Monitor | Regina, Saskatchewan
Capstone Project | *June 2026 – Present*

- Develop with ESP32 hardware and software with C/C++ in Arduino to detect and track air quality using machine learning
- Lead and collaborate with a team of software developers with the role of team lead to keep the team on task
- Document our systems and plans for future maintainers and developers to easily integrate into the codebase

Social Media Database Platform | Regina, Saskatchewan
Java Programming Course | *May 2026 – June 2026*

- Developed a TCP socket-based application for managing social media data in MySQL to have a user-friendly command line interface for manipulating tables
- Built features for data queries and record management for more seamless data manipulation
- Worked cooperatively with a team of student developers using Git for version control to have a seamless and asynchronous workflow between everyone on the team

Hobbies and Interests

- Maintain a home server with enterprise server and network hardware
- Develop personal programming projects to solve problems
- Operate and integrate my own machines with Linux
